

Ideas for Use

- * Math Groups
- * Early Finishers
- * Math Centers
- * Intervention
- * Big Buddies
- * Parent Volunteers

Directions

Print out the game board(s) you want to use and the corresponding playing cards. All of the playing cards were created in such a way that no paper is wasted. Use a paper trimmer or scissors – but you will not have any left over pieces! NO WASTED PAPER!

Laminate for durability!

You will need a playing piece for each student (cubes, tokens, coins, etc) and that's all! No dice or spinners are needed for these games. All games are played the same way, but the skills change.

I personally love these games because in order to play, the students actually have to be able to RECOGNIZE the NUMBERS! It is GREAT practice! I always use these in math groups before putting them into math centers.

These are easy to store and organize! I keep each game board and the corresponding playing cards in a big ziplock bag.

How to Play

Mix up the playing cards for the game. Place them face down in a nice and tidy pile.

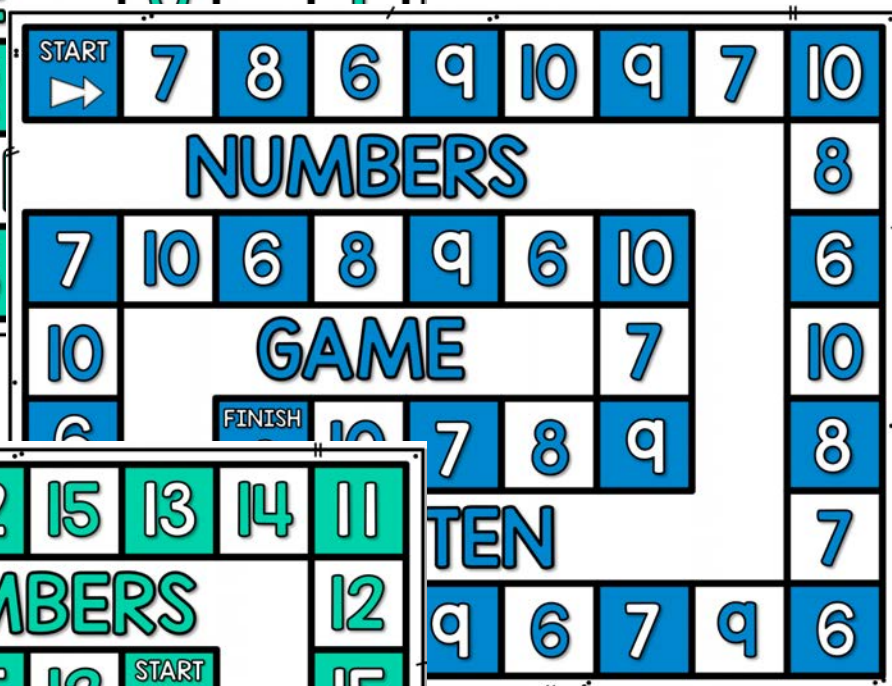

Player One takes the first card off the top of the pile. Player One identifies the number and moves their playing piece to the FIRST number on the board that matches their card. Their card goes face up in a new pile so as not to get the two piles mixed up. Player Two takes the next card, identifies the number, and moves their playing piece to the FIRST number on the board that matches their card. If a player is already on the spot, the player draws another card!

In order to get to the finish, each player needs to pull the card that matches the last available spot on the board! If players run out of cards, mix up the cards and start again!

Create LARGE sized GAME BOARDS.

Prints on 4 sheets of paper.
Trim, overlap, and glue together!
